

How many routers can be installed on a fiber optic broadband connection

Overview

It is mandatory that you use a single router to establish the Internet connection, if we have an FTTH connection, you can only connect a router to the ONT if you have an external ONT. There's no magic number as to how many devices fiber internet can support. You probably. One solution is to run your own "ISP" and redistribute the connection - that is not uncommon, but not what was asked) I am assuming a very small setup so that is why I have made the suggestion. But the above is an. Fiber optic internet is generally installed in the following 5 steps, which we'll dive deeper into throughout the article: A technician checks your area and prepares the connection from the neighborhood fiber network. We used that connection for a wireless. Once the ONT is installed, the next step is to set up your router and configure the Wi-Fi network.
