

How many years can a distribution box be used

Overview

You can generally expect a power distribution box to last anywhere between 8 to 15 years, depending on the application it's being used for, the environment it's operating in, and how frequently it's serviced. Rubber boxes which spend their lives indoors are much more likely to have a longer. Generally speaking, the electrical distribution box can use 8~10 years. It receives electricity from the main supply and distributes it safely to various circuits within homes, offices, or industrial facilities. It helps organize, protect, and control electrical connections in residential, commercial, and industrial electrical systems. Distribution. Yet the distribution box is a highly complex component that not only ensures safe power distribution, but is also responsible for protection in an emergency.
