

How much does a 48-core optical fiber cable retail

Overview

For fiber cable materials only, expect \$0.52 per foot for wholesale bulk purchases, or \$1 to \$6 per foot at retail. The wide price range reflects differences in fiber strand count, outer jacket construction, and application type. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed. Explore SM/MM options, PE/LSZH jackets, and CE-certified durability. Single-mode fiber costs less per foot than multimode fiber, but it requires more. 48 Fiber MPO Cables are most commonly used in establishing backend trunk connections between fiber patch panels. Each 48 Fiber MPO cable is able to consolidate the amount of multifiber cable assemblies into a single harness, eliminating unnecessary clutter and heft from congested networking racks. Features: OM3 MultiMode Design: With a 50/125 μ core-core diameter, OM3 MultiMode fiber technology provides high bandwidth and long-distance transmission.
