

How much does it cost per meter to bury fiber optic cable underground

Overview

A representative range often cited is \$0.76 per meter) for materials plus labor, depending on fiber type (single-mode vs multi-mode), conduit size, and local conditions. Budget planning should account for potential surprises, especially in urban. The average cost of installing underground fiber optic cable varies widely depending on location and project complexity. Typical industry estimates include: Urban areas are usually more expensive due to: In contrast, rural broadband projects often benefit from simpler trenching conditions and fewer. These networks are constructed both underground and through aerial fiber, at an average cost of \$1,000 to \$1,250 per residential household passed or \$60,000 to \$80,000 per mile. 70/ft for the cable) underground. The installer would use a directional boring machine, and the cable would be pulled thru a 1. It forms a critical backbone for modern communication networks across both urban and rural environments.
