

How much does it cost to modify the circuit of a distribution box

Overview

The typical project runs from roughly \$1,500 to \$3,500 for standard 100- to 200-amp panel replacements in existing walls with minimal routing. Higher-end upgrades—such as 400-amp service, subpanel additions, or a full rewire—can push totals well above \$10,000. Homeowners typically see a wide range in costs when replacing a breaker box, driven by service upgrades, panel type, and local labor rates. The price you pay will hinge on amperage, number of circuits, wiring conditions, and whether a permit is required. Check with a local pro for your specific job. In the USA, replacing the breaker box cost around \$100 (2 or 3 connection breaker boxes) but it may go. The average cost to replace a circuit breaker box in 2024 typically ranges from \$1,500 to \$3,500, with most homeowners spending around \$2,000 to \$2,500 for a standard replacement.
