

How to change the color of a fiber optic light source to red

Overview

Vary the Color: By using colored filters with white light sources, fiber optic lighting can have many different colors and by automating the filters, vary colors in any preprogrammed sequence. Think of a traffic light; you have red, yellow, and green. Each of these colors signify something very specific and we know based on these colors what they mean and what we are supposed to do. There are six fundamental colors in the visible spectrum – These are red, orange, yellow, green, blue, and. The lights in this video are running in 'Disco Tech' mode, just one of 14 modes available on every installation. Change the mode to match the mood, from solid colors to red, white & blue for the 4th of July!. more If you're old fiber optic lights are dull and tired, give us a call to see how we. Understanding fiber-optic color codes is essential for any technician tasked with installing, maintaining, or troubleshooting modern fiber networks. The primary purpose of fiber optic color coding is to identify. At some point, you may need to remove the color wheel to change the fiber optic bulb, and fortunately, this is a task you can usually complete yourself.
