

How to configure DNS on an Australian mobile fiber optic router

Overview

Log in to your router's admin panel by opening a browser and navigating to your gateway IP (e. Look for a section labeled "WAN," "Internet," "Network Settings," or "DHCP. " The DNS fields are usually found here. You're probably wondering to yourself "how do I configure my NBN modem?"

" Luckily, it's quite straightforward, and this guide will cover helpful Bring-Your-Own (BYO) router settings. As. If you want to host a service such as FTP or SSH on your network, use the DNS advanced settings to set up Dynamic DNS for the hostname, so outside consumers of the service can still access it when your host IP address changes. You must set up a Dynamic DNS account with a third-party provider before. The FRITZ!Box is optimally prepared for use with DNS:NET. The complete FRITZ!Box range of functions for internet, telephony, and TV. When you have a BYO modem, you may need to configure the settings so that its compatible with your new internet service provider.
