

How to install a Qualcomm fiber optic terminal box

Overview

This guide walks through a practical, real-world installation process used in FTTH deployments. Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. If you do not have relevant experience and skills, it is recommended to ask a professional to install it. Preparations: Before installation. The following steps provide a detailed installation guide for fiber termination boxes: Before starting the installation, you will need the following tools and materials: Fiber termination box: Select a fiber termination box that meets your requirements and specifications. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. The indoor fiber distribution terminal is a compact fiber box solution for installation requirements in small to mid-sized MDUs, multiple dwelling units, or multiple tenant units (MTU).
