

How to set the time on a fiber optic router

Overview

A quick answer is: log into your router's settings, locate the schedule or time-management feature, and set the desired time slots for internet access. With a few clicks, you can automate your network to suit your family's routine or work hours, making your online. System time is the time displayed while the router is running. The system time you configure here will be used for other time-based functions like Parental Controls. As far as I understand, I need a PPPoE username and password to connect. I never received it from Telekom, as well as Access number (Zugangsnummer). Maybe I'm wrong and the connection. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Specify the Time Zone if you need to synchronize the time.
