

How to store indoor fiber optic cables

Overview

Instead, these cables should be stored in a dry and UV protected location, such as a room or container.), open flames or excessive heat. This article offers fiber optic cable storage tips in five main aspects in detail. Before storing an optical fiber, it is important to transport or move it correctly because many optical fibers are heavy. They're made up of thin glass or plastic fibers that can easily be damaged by environmental factors, physical stress, and improper handling. Keep Cable Connectors Clean and Dry Before using fiber optic cables, clean the connectors on the cable and on the cables or ports the. Whether you are a network administrator, a telecom professional, or an enthusiast handling fiber optic cables, proper storage is essential to maintain their integrity and ensure optimal performance over time.
