

Huawei SAN Fiber Optic Switch

Overview

Huawei OceanStor SNS5120 is an intelligent Fibre Channel storage switching platform featuring high density, performance, and availability. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. The Huawei Fibre Switch doesn't just move data—it defies physics. In a world where every millisecond counts, this hardware is the unsung architect behind everything from lag-free 4K streaming to real-time stock trades. The SNS2124, 2224, and 2248 are designed to reduce enterprises' SAN costs while improving SAN scalability and ease of use. Basic Information: Product Type: SAN Switch Transmission Rate: 32. The unique iLossless algorithm offers 85% improvement in Input/Output Operations Per Second (IOPS) performance. E2E latency reaches as low as 0. Unique Intelligent Lossless NOF (iNOF) features, plug-and-play, and second-level switchover. An active optical cable (AOC) is a fixed-length optical fiber with optical modules at both ends.
