

Huawei charging pile optical module

Overview

Huawei announced plans to release the HiCharger DC fast charging module, marking its entry into electric vehicle charging pile manufacturing. The module converts 380V AC to 200-1000V DC power, boasting a 0.6% failure rate versus the 3%-5% industry average. This enterprise started by communication is one. From "charging for one hour and queuing for four hours" to "having a cup of coffee and starting with a full charge", overcharging technology has gradually matured and been commercialized, bringing great convenience to new energy vehicle users. The core values of Huawei FusionCharge's. The innovative value of Huawei's new generation of 40kW DC charging modules is mainly reflected in the following four aspects: More reliable: Using innovative full glue and full isolation process, it can operate reliably for a long time in harsh environments, and the annual failure rate is less.
