

Huijue PoE Switch Settings

Overview

The address of the PoE switch is: 192. 1 and username and password are: admin/admin The IP address in the switch is static (fixed) and therefore the computer's IP address and subnet mask must be static. The display poe device command displays information about the device supporting Power over Ethernet (PoE). As shown in Figure 1, a PoE system includes the following elements:

- PoE power supply—A PoE power supply provides power for the entire PoE system.

Switches with PoE, or Power over Ethernet switches, are network switches that can transmit both data and power through Ethernet cables. This technology allows devices such as IP phones, wireless access points, and. This document describes the configurations of WLAN, including WLAN Service Configuration, Radio Resource Management, Roaming, WLAN QoS, WLAN Security, WDS, Mesh, Location, Hotspot 2.0, Dual-Link Cold Backup, N+1 Backup.
