

Information on the construction of communication base stations by China Tower

Overview

The Company is principally engaged in the construction, maintenance and operation of base station ancillary facilities such as telecommunications towers, public network coverage in high-speed railways and subways, and large-scale indoor Distributed Antenna Systems (DAS). This photo taken on July 25, 2022 shows a 5G base station constructed by China Tower in Suzhou, east China's Jiangsu Province. 8 million 5G base stations now operational across China, the widespread adoption of 5G is delivering substantial benefits to both individuals and businesses. China Tower ended 2022 with 2.05 million telecom towers installed, representing a net increase of 17,000 sites from the end of 2021. By the end of June this year, the company had invested 263.6 5G stations for every 10,000 residents, CGTN reported.
