

Inquire about waterproof edge data center

Overview

A one-of-a-kind data center with 300MW of on-site solar power and long-term battery storage located between San Francisco and Los Angeles. Edged Phoenix brings 48MW of capacity, along with waterless cooling to the fast growing Southwest region. market with high speed connections nationwide. They are proven to accelerate deployment while driving end-to-end simplicity and reduce risk of hidden costs and project delays. They are designed for the Edge and built with the most advanced power and cooling. Edged US is scaling high-density AI data center campuses across major U. This is the perfect solution for securing massive IT infrastructures, to be implemented outside the company building. This shift isn't just technical—it's reshaping industries, redefining network design, and creating new opportunities for competitive advantage.
