

Intelligent operating device for power distribution cabinet rx

Overview

The DTU Intelligent Electrical Control Cabinet is an automated control device designed for power distribution systems. It integrates data acquisition, remote monitoring, fault protection, and communication management into a single unit. An Intelligent Power Distribution Unit (iPDU), also known as a Smart PDU or Intelligent PDU, is a critical component in modern data center infrastructure. iPDUs serve as a centralized power management solution that enhances the efficiency, reliability, and monitoring capabilities of power. What CDU (coolant distribution unit) options does nVent provide?

Do you support high-density deployments above 30kW per rack?

Can air and liquid cooling coexist in the same data center?

How do your liquid cooling products support ESG and sustainability goals?

. ABB's portfolio of smart control cabinets offers a convenient and cost-effective solution et today's diverse and evolving customer requirements within power distribution.
