

Intelligent power distribution cabinet control module

Overview

The intelligent EL2P PDU secures and monitors critical network infrastructure powering ATMs, trading systems, and branches. MICO is the intelligent power distribution module from Murrelektronik for 12VDC, 24VDC or 48VDC. It monitors currents, indicates when approaching the maximum load and makes targeted shut downs during over-stress or short circuits. This makes sure systems run at maximum capacity. Complex power. Are modular or configurable cooling options available?

What CDU (coolant distribution unit) options does nVent provide?

Do you support high-density deployments above 30kW per rack?

Can air and liquid cooling coexist in the same data center?

How do your liquid cooling products support ESG and. Managing and installing a rack power distribution unit (PDU) has never been easier than with the EL2P PDU. In doing so, we apply our 30 years of know-how, which we have implemented in numerous projects for different industries - for example in the form of: For. Overview: PLS-DP series of intelligent precision power distribution Cabinet series products include: power, UPS input, output, counter, three varieties of Cabinet. It is not just a distribution Cabinet, power inputs, outputs, power monitoring system as a whole set of integrated power distribution. With ControlPlex®, PowerPlex® and SCS® Smart Control Systems E-T-A offers intelligent complete systems for power distribution and overcurrent protection for industrial applications, watercraft and vehicles.
