

Ireland High-Speed Bridge

Overview

Proposal The idea for a Scotland to Northern Ireland Bridge, sometimes branded in the press as the "Celtic Crossing" or "Irish Sea Bridge", was revived in January 2018 by Professor Alan Dunlop of the University of Liverpool. He proposed a combined road and rail crossing between Portpatrick, in Dumfries and Galloway, and Larne in Northern Ireland, claiming that his rough estimates showed it would be viable. Overview The Irish Sea Bridge, sometimes called the Celtic Crossing by the media, is a hypothetical rail and road bridge that would span the Irish Sea and connect the island of Great Britain to the island of Ireland. It is one of a number of proposed cross-Sea Channel crossings. So far the project has at various times received support from senior politicians in both the UK and in Ireland, and across a number of political parties. The project has also received support from newspapers, periodicals. In October 2018, MP, transport spokesman for the Conservative Party wrote an article in support of the bridge, stating that the munitions dumped in the sea after the war, often cited as a hurdle for the bridge project.
