

Is a gigabit router necessary for a 20m fiber optic connection

Overview

You don't need a special router, per se, but you do need one that can handle the speed fiber provides. If you're paying for gigabit fiber service, make sure your router supports at least gigabit Ethernet ports and dual-band or tri-band WiFi (like WiFi 5 or WiFi 6). Network Interface Card (NIC) The NIC is the core component that allows a computer to access the network. With it, computers can send and receive data between network devices. This guide clarifies the requirements for optimal performance, explaining what your existing router can handle and when an upgrade is essential for unlocking the full potential of your blazing-fast fiber connection. Get ready to understand your network's needs. This should help you make an informed decision. The answer is actually no—fiber optic equipment differs significantly from cable setups. Your new. Once the ONT and router are connected via Ethernet cable, the router creates a WiFi signal to connect your devices, or you can use additional Ethernet cables to connect your devices to your router.
