

Is the Huawei N7500 a fiber optic switch

Overview

It is an optical core switching (OCS) device applied to service scheduling nodes at the backbone layer of MANs. OSN 7500 II adopts a unified switching architecture and can function as an MPLS/MPLS-TP-based packet device or a TDM device. That is, it functions. The OptiX OSN 7500 is a piece of new generation equipment that Huawei develops based on what the metropolitan area network (MAN) is like and its development trend in the future. Technical Manual - System Description 1 Overview of the OptiX OSN 7500 Figure 1-1 Outer view of the OptiX OSN 7500 As an. Supports Intelligent ASON based Mesh network can against multi-node failures, improving network reliability by 10 times Supports Single-span transmission for a distance of 270km without Raman amplifier. Supports Specified 2M optical interface to support direct connection between MSTP equipment and. OSN 7500 Intelligent Optical Switching System OptiX OSN 7500: Access product manuals, HedEx documents, product images and visio stencils.
