

Kuwait Active Optical Device 800G

Overview

The 800G QSFP-DD Active Optical Cable is designed for 800 Gigabit Ethernet links over OM4 multimode fibre. This cable is compliant with IEEE 802.3ck, QSFP-DD HW Specification Rev 6. Transmission is based on VCSEL 850nm with electrical driver, while Receiver side is. The next key development is 800G, and the industry is already gearing up to deploy this next generation of client optics in hyperscale data centers. Developments in three distinct areas are needed for 800G deployment: optical modules and direct attach copper (DAC) cables, switch ASICs, and 800GE. TE Connectivity (TE) is expanding its high-speed connectivity portfolio with new optical transceivers, complementing our Active Optical Cables (AOCs) and copper solutions. Designed for hyperscale data centers, AI/ML, High Performance Computing, and telecom applications. We can not solve them without this magic box! Highly Integrated, High-Performance and Power-Efficient Devices Bring Flexible Deployment Options to Accelerate AI Infrastructure Build-Out SAN JOSE, Calif. -- (BUSINESS WIRE)-- Credo Technology Group Holding Ltd (Credo) (NASDAQ: CRDO), an innovator in providing connectivity at scale through fast.
