

Laos XL-type power distribution box

Overview

As a power supply system with AC 50Hz-60Hz, rated working voltage 380V, rated working current up to 630A, and breaking capacity up to 15kA, it provides power conversion, distribution and control for power distribution equipment such as power, lighting and fans. XL-21 floor-type low voltage power distribution switchgear

Production description The XL low-voltage distribution box is suitable for power users such as power plants, substations, industrial and mining enterprises, and highway tunnels. XL series power distribution box is designed by our company combined with different control equipment. It is suitable for power control of power plants, substations, industrial and mining enterprises and various terminal power distribution fields, such as soft start control, power automatic. XL-21 series low-voltage alternating-current power distribution cabinet is applicable for 3-phase 3-wire, 3-phase 4-wire and 3-phase 5-wire systems up to and including AC 690V in power generation and distribution stations as well as industrial and mining enterprises, used for power lighting. The XL-21 low-voltage power distribution box is suitable for use in power plants and industrial and mining enterprises for power distribution in three-phase four-wire or three-phase five-wire systems with AC voltages of 500V and below. Switchgear interlocking requirements (mainly referring to the.
