

Latest Version of Optical Cable Rectification Standards

Overview

IEC 60794-1-1:2023 applies to optical fibre cables for use with communication equipment and devices employing similar techniques. Electrical properties are specified for optical ground wire (OPGW) and optical phase conductor (OPPC) cables. Scope: This Standard specifies performance, transmission, and test and measurement requirements for premises optical fiber cable. The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies. The technical content of IEC publications is kept under constant review by the IEC. Hybrid communication cables are specified in the IEC 62807. This document outlines the specifications for a single-mode optical fiber and cable designed for use around the 1310 nm zero-dispersion wavelength, suitable for both the 1310 nm and 1550 nm regions, and compatible with analogue and digital transmission. In order to verify whether the cabling system meets the relevant requirements, it is necessary to conduct relevant tests.
