

Lithuanian Smart Patch Panel Upgrade Version

Overview

From your app, open your menu by pressing the three lines in the bottom left corner, then select Settings. Select your panel (Smart Hub or SkyControl). If not, it will say Update Available and list the version. At the core of any IT Service Management framework are processes for configuration, change, and incident management. SMARTPATCH provides simple and controlled management and recording. Belden PatchPro® offers a complete intelligent ready physical layer management system that uses RFID (radio frequency identification) technology for wireless identification of individual patch cords and real-time monitoring of unintended physical changes in network infrastructure. The MCP and DCP feature an integrated LCD display and keypad, which provide technicians access to. A PCU (Panel Control Unit) is equipped at the front of the patch panels and scans the area in front of each port. Intelligent panels communicate with and receive power from the SMARTPATCH network scanner, which in turn communicates with the SMARTP for mounting in a 19" rack). LEDs above each port are used to trace co lligent-ready panel without the antenna.
