

MTP Field Assembly Connector

Overview

MTP® connectors are the proven and trusted MPO style format offering state-of-the-art multi-fiber and mechanical performance. The best high density fibre optic solution is the multi-fibre push-on (MPO) technology and especially the MTP connectors offering 12 or 24 fibers in a single interface connector smaller than an RJ45 connector. The plug and play nature of MTP & MPO cabling systems was originally designed so that 12. US Conec offers a full suite of MTP® brand connectors for a variety of applications and operating environments. Now standard on all EDGE™ and EDGE8® assemblies. These connectors offer advantages in crowded data center racks but have unique challenges to the termination like ribbonizing fibers and polishing relatively large fiber. MTP® is the acronym for Multi-fiber Termination Push-on, which is a registered trademark of US Conec.
