

Making Copper Lugs for Distribution Boxes

Overview

Cable lug manufacturing involves forging annealing copper or aluminum tubes through heavy power presses, followed by drawing processes that reduce diameter and wall thickness, then finishing with electro-tinning for corrosion resistance and optimal conductivity. With a strong emphasis on precision. Brumall manufactures aluminum and copper mechanical lugs, neutral bars, neutral assemblies and power distribution blocks. more Audio tracks for some languages were automatically generated. Learn more Make Your Own High Quality Copper Lugs!! In this video I'm going to show you how I made my own high quality copper lugs (copper. Copper terminal lugs are conductive end connectors used to terminate, splice, or bolt electrical conductors. They may be crimped or soldered and cover cable ends for reliable connectivity. Common Types & Materials Bare copper: High conductivity, best for dry environments. All products comply with IEC 61238, UL.
