

Malta signal transmission fiber optic cable

Overview

Malta has cemented its status as a digital frontrunner, with telecoms provider GO plc announcing the completion of its nationwide fibre rollout – a transformative €100 million project that now brings ultra-fast internet to 371,000 homes across Malta and Gozo. These components will be integrated into the high-voltage subsea cable that will connect Malta to the European energy grid via Sicily. Nearly half of the 104 kilometres of fibre optic cable required for the project has already been produced, tested, and shipped to Nexans' high-voltage cable plant. VALLETTA (MALTA) (ITALPRESS/MNA) – The multinational Nexans has completed approximately half of the fiber optic cable for the second submarine power interconnection between Malta and Sicily. The milestone, described by GO CEO.
