

Matching Fiber Broadband with Routers

Overview

When shopping for compatible routers, you must match the router's technology to your internet type. For Fiber Internet: Look for routers with a dedicated 2. Fiber offers symmetrical speeds (fast uploads and downloads), and older routers will bottleneck this. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price tag.
