

Materials required for fixing cable trays

Overview

Selecting the right material for a cable tray is crucial as it impacts durability, cost, installation, and long-term performance. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. The International Electrotechnical Commission (IEC) provides detailed guidelines for cable tray systems under IEC 61537.
