

Metal cable trays are divided into

Overview

Explore various cable tray types and sizes for electrical installations. Learn about ladder, perforated, solid-bottom, wire mesh, and channel trays in this complete guide. What is Cable Tray?

A cable tray is a unit, or set of units. According to the National Electrical Code standard of the United States, a cable tray is a unit or assembly of units or sections and associated fittings forming a rigid structural system used to securely fasten or support cables and raceways. Cable trays made by JLH Electric can be divided into carbon steel cable trays, stainless steel cable trays, aluminum alloy cable trays, fiberglass (FRP) cable trays, fireproof. Below are the top 7 types of cable trays and their applications, along with their key advantages.

Jan 22, 2026

Cable tray

Several types of tray are used in different applications. A solid-bottom tray provides the maximum protection to cables, but requires cutting the tray or using fittings to enter or exit cables. A deep, solid enclosure for cables is called a cable channel or cable trough. A ventilated tray has openings in the bottom of the tray, allowing some air circulation around the cables, water drainage, and allowing some dust to fall through the tray. Small cables may exit the tray through
