

Metal welding of distribution boxes

Overview

In the manufacturing process of metal distribution boxes, welding constitutes a critical stage following sheet metal cutting and bending. Ever wondered how the sturdy distribution boxes controlling electricity in buildings, factories, or even outdoor solar installations hold their shape so reliably?

The answer lies beneath the surface - in the powerful art of welding. At its core, welding is about creating connections that don't just. This instructables details how to MIG weld a box made out of old scrap metal. I used 1/8" steel from a local scrap yard. The amount depends on the size of box you want. Plasma cutter or other tool to cut the metal pieces. Aluminum MIG and TIG Reliable, high quality aluminum MIG and TIG welding products with tight tolerances in chemical composition.
