

NAS access fiber optic switch

Overview

To access your LUNs using Fibre Channel, you must install Fibre Channel adapters on your Synology NAS. Cisco MDS 9124V 64-Gbps 24-Port Fibre Channel switch brings the latest high-performance, low-latency Fibre Channel Storage Area Network (SAN) technology to market. Along with the higher bandwidth, the Cisco MDS 9124V switch supports ease of configuration and management, detailed and in-depth. DAC is the way to go for short distance, 10Gbps (or 25, or 100Gbps). This is by far the most affordable solution. Have you measured the current throughput, and is it maxing out a 1Gbit connection?

If not, 10Gbit won't make it any faster. Speed: The transmission speed of. With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. It also enables easy expansion by simply adding more fiber or network switches. Long-distance installations often require fiber optic cables to connect different sites because of. Check each product page for other buying options.
