

Nordic Flame-Retardant Optical Cable

Overview

Available in both multimode (OM3/OM4) and singlemode (OS2) variants, they support configurations from 4 to 24 cores in a durable central loose tube design. Meeting stringent international standards, these cables are tested for both fire resistance (IEC 60331-25) and flame. These composite cables are specifically designed for radiation sensors and to withstand harsh environments encountered in nuclear power plants. These cables are engineered using the only high class jacketing and radiation. bus control cable, suitable for cable tracks with UL recognition, CSA. einforced Plastic (FRP) armouring. FLOWGUARDTM requires no grounding co a maximum of 12 fibres per bundle. The fire resistant cable assures reliable circuit integrity to keep emergency evacuation systems operational even whilst the cable. Fire Resistant Cable PH 120 SF.
