

One fiber optic cable connecting two routers

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. On each floor each ethernet cable will be connected to a router, which will then distribute the internet connection through LAN or WIFI, as needed. Can I Connect Two. One solution is to run your own "ISP" and redistribute the connection - that is not uncommon, but not what was asked) I am assuming a very small setup so that is why I have made the suggestion. Check the specs, that the advertised wavelengths and desired distance/length match. Assuming you don't. Connecting two routers together is one of the most effective ways to extend your WiFi coverage, create separate network segments, or repurpose an old router instead of throwing it away.
