

Optical Communication Module Solution

Overview

Build high-performance and power-efficient optical modules for wireless, data center and communication applications with our optical networking ICs. Our products simplify designs by integrating transceivers, transimpedance amplifiers, post amplifiers and laser drivers. Whether you are creating a 100-Gbps or 400-Gbps, small form-factor pluggable (SFP) module, SFP+ transceiver, XFP module, CFP, X2/XENPAK module. The optical communication VCSEL (Vertical Cavity Surface Emitting Laser) that enables direct modulation with an electrical signal realizes a low power consumption, low cost optical communications module and supports high-efficiency communication network systems such as data centers. The move to the. Surface-emitting lasers are typically vertical-cavity surface-emitting lasers (VCSELs). For more than three decades, we have provided components and subsystems to networking equipment manufacturer dards and operate at data rates in excess of 100 Gbps. According to the company, the Silicon photonics Co-packaged Advanced Light Engine (SCALE) solution is the industry's first Optical Compute Interconnect Multi-Source Agreement (OCI).
