

PD Spectrometer

Overview

0ml Flexible power source Power requirement is flexible from 100 to 240V AC
Halogen lamp Long life span of light source (approx 2,000hours) Selection of wavelength Auto selection of wavelength using motor Square, Round cuvette usable Square and round cuvette. Minimum sample volume is 1. The innovative T-R-T design provides the flexibility of highly customizable wavelength ranges. You can choose the range in the VIS or. The Phekda & Phekda-NIR (PD & PD-NIR) from OtO Photonics is a Spectrometer with Wavelength Range 535 to 1578 nm. Get product specifications, Download the. The Shimadzu PDA-7000 is high performance optical emission spectrometers, utilizing the PDA method as standard, which enhances the accuracy and reliability of analysis. The PDA method, combined with excellent hardware quality, make the PDA-7000 suitable for any application in metal analysis. They. We use intensity modulated laser sources throughout the visible and near infrared spectral range with modulation frequencies from 10 MHz well beyond 1 GHz to generate Photon Density Waves in strongly light scattering materials.
