

Patch cords for optical cables of different diameters

Overview

Fiber optic patch cords can be classified according to the fiber connector types, with the most common and mainstream being SC fiber optic patch cable, LC fiber optic patch cord, FC fiber patch cord, ST fiber patch cable, as well as MPO fiber patch cable, MU. Fiber optic patch cords can be classified according to the fiber connector types, with the most common and mainstream being SC fiber optic patch cable, LC fiber optic patch cord, FC fiber patch cord, ST fiber patch cable, as well as MPO fiber patch cable, MU. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system. It is composed of fiber optic cable and fiber connector that fixed at both ends of optical cable, has been widely used in various fields such as fiber optic. We manufacture custom patchcords with single mode and multimode fibers that exhibit low insertion loss and high return loss. Patchcord lengths are customized. Fiber optic patch cables are ideal for supporting high speed telecommunication network fiber applications. They are manufactured and tested in compliance with TIA 604 (FOCIS), IEC 61754 and YD/T industry standards.
