

Pneumatic Assembly of Fiber Optic Patch Cords

Overview

In this video, we take you inside the manufacturing process of a fiber optic patch cord, showing the key assembly steps that directly impact optical performance and long-term reliability. Their performance directly impacts signal quality, insertion loss (IL), and return loss (RL). □□ Assembly Process Includes: • Fiber stripping and preparation • Precise fiber insertion • Connector crimping. Our Fiber Optic Patch Cord Production Line equipment includes everything needed to manufacture high-quality patch cables and pigtails: from cable making machines and pneumatic crimpers to precision polishing fixtures and IL/RL test stations. patch cord making machine, fiber patchcord production. Optical Fiber Vertical Crimping Machine For Assembly Of Optical Fiber Connector Parts Model:CLX-Y650, CLX-Y65B Place of Origin:ShenZhen,China Quick Detail: ● One-time Crimping: Ceramic lock pin and metal liner can be crimped once, faster and more convenient ● ST, SC (UPC, APC), LC (UPC, APC), FC. Brand: FOCC and OEM factory We will provide technical guidance throughout the entire process until your company is skilled in operating the equipment to produce high-quality and qualified products. According to our customer's feedback, this is one of the best selling products within the current market situation.
