

Pre-installed fiber optic panel on the wall

Overview

Wall-mount fiber patch panels are a space-saving solution for FTTH (Fiber to the Home), FTTB (Fiber to the Building), and small office network installations. Mounted directly on the wall, they offer organized fiber terminations in compact spaces where rack systems are not available. Telegärtner offers a fast and easy to install Fiber-In-The-Home system especially for retrofitting or upgrading of a fiber optic cabling in houses, apartments and residential units. This includes pre-assembled FO outlets and FO wall and patch panel. Thanks to the preconfigured FITH OAD/S connection. Whether you're setting up a home office network, a small data closet, or a remote telecom node, wall mount fiber patch panels offer a practical solution to terminate, manage, and secure fiber connections without the need for bulky racks or dedicated desk space. If the rack has one shelf per each zone/room, you can add one panel per each shelf for the best setup.
