

Price fluctuations of optical fiber and cable products

Overview

The fiber optic market is experiencing unprecedented volatility. As an essential component in global telecommunications, defense, and AI infrastructure, prices for products like g657a2 fiber, single mode fiber, and bare fiber have seen dramatic increases since late 2025. Over the past several months, upstream material costs and supply chain constraints have pushed fiber prices upward, directly impacting cable assemblies, patch cord production, and passive optical components. For distributors, telecom. In the latest Optical Fibre and Cable Market Outlook, CRU examines the recent acceleration in fibre pricing and the tightening supply conditions emerging in early 2026. After an extended period of subdued pricing in several regions, optical fibre prices are rising sharply alongside sustained demand. In 2026, the global optical fiber market experienced a new round of price fluctuations, with some optical fiber products reaching near seven-year highs. 657A2 grades have all seen dramatic increases. 652D optical fiber prices are rising in 2025-2026, how FTTH cable budgets are affected, and what procurement teams in Europe, Latin America, Africa and the Middle East can do to manage risk.
