

Price of outdoor backbone optical transmission cable

Overview

A simple 1-core FTTH drop cable costs around \$0.13 per foot, while a 288-count optical fiber cable for building backbones can reach \$6 per foot or more. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Fiber optic cables with glass optical fiber (GOF) have a high data transmission rate and range. Easy to handle thanks to flexible and compact design. With additional water transport protection in the longitudinal direction. ss yarn for strain relief and rodent protection, the shown product values are nominal values. Prices are net prices without VAT and surcharges. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. This guide presents ranges in USD and practical price estimates to help.
