

Prices of Aerial and Direct-Buried Optical Cables

Overview

I've seen many successful small ISPs start with aerial and only bury later as they grow and need more reliability.

Cost Comparison

Based on real projects I've worked on (2025-2026 prices):

- Aerial:** \$3-8 per meter (cable + labor + pole. CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets. This breakdown gives you real numbers to build better estimates. We'll show actual costs for materials, labor, and hidden expenses that can kill your profit margins. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method. Direct buried fiber optic cable is a kind of optical cable which is armored with steel tape or steel wire outside. Direct burial is the most convenient laying method for fiber optic. Underground fiber optic cable is designed for direct burial or conduit installation and is widely used in FTTH networks, backbone infrastructure, and industrial communication systems.
