

# Quality Assurance of Explosion-proof Distribution Boxes

## Overview

Always check for certifications like ATEX and IECEx when selecting explosion-proof distribution boxes. Match the protection type and enclosure rating to the specific hazards present at your site. HEXLON stands out as a trusted provider of explosion-proof solutions, offering advanced design and construction for hazardous environments. These devices are used as lighting, power, and maintenance distribution boards. They're designed to meet two critical challenges: contain internal explosions and prevent external ignition sources from interacting with volatile atmospheres. But beyond compliance paperwork, what makes these solutions truly valuable?

It's about protecting lives, preventing environmental. ATEX Directive 2014/34/EU Compliant Equipment - the Equipment and Protective systems intended for use in Potentially Explosive Atmospheres (ATEX) Directive 2014/34/EU provides the technical requirements to be applied and the relevant conformity assessment procedures before placing this equipment on.
