

Regulations for the Construction of Dedicated Communication Equipment Rooms

Overview

ANSI/TIA-569-D provides the outline for these spaces and the allowances that best practice should allow for. Generally the communications room should be built to provide enough space and cabinets for the largest amount of expected data outlets that the communications room will. This section includes the specifications for constructing and building out of Telecommunications Equipment Rooms (MDF/IDFs) to be used for supporting telecommunications and other special systems. Upon completion of the installation, a third party field verification firm will independently verify. This approved document supports requirement R1 of Schedule 1 to the Building Regulations 2010. This approved document takes effect on 26 December 2022 for use in England. It does not apply to work subject to a building notice, full plans application or initial notice submitted before that date. The telecommunication spaces include the Entrance Telecommunication Room (ETR) and the Telecommunication Room (TR). 3 f s must be considered when designing the room layout.
