

Relay protection fiber-insulated spiral tube anti-tracking

Overview

Flame retardant crosslinked polyolefin heat shrink tubing, with erosion and tracking resistance manufactured with an inner layer of hot-melt adhesive which provides electrical stress control. Suitable for electrical insulation of medium voltage indoor and outdoor power cable. It provides an extra layer of protection against abrasion ensuring the longevity and integrity of the cables. Its advanced. Used to provide insulation protection for cable terminal, load-break switches, power circuit breakers, etc.) If you are interested in our products and want to know more details, please leave a message here, we will reply you as soon as we can. Cotrangular provide cost effective. REPL Heat Shrinkable Anti Tracking tubes (RART) are used to reconstruct the electrical cable by providing insulation and tracking resistance as well as environmental protection against chemical pollution and UV rays for cable cores of plastic and paper insulated cables and terminations rated up to. Spiral tubing is used for mechanical protection and bundling of cables, pipes and wire harnesses.
