

Requirements for cable tray supports in cleanrooms

Overview

IEC standards guarantee that these cable trays meet the following requirements: Have adequate load-carrying capacity for electrical cables to prevent sagging. Show suitable corrosion resistance against environmental attacks. To meet the high standards required in the food industry and. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. or cable carrier systems in cleanrooms. Our decades of experience from hundreds of realized projects in various industries with diverse demands on our cable carrier systems, lead to new custom and applicati n-specific solutions for our customers. Our specialists will support you from the planning. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety.
