

Requirements for electrical assembly boxes in Belarus

Overview

For the areas where no unified CU/EAEU Technical Regulations exist, Belarus has its National requirements, in particular: EAEU (EAC) Certification and Declaration. Belarus Energy Efficiency and TR 2018/024/BY Radio/Telecom Approvals. Electronic and electrical products entering the Belarusian market must comply with the unified EAC certification requirements of the EAEU, which is a mandatory market access system. There are two certification forms divided by product risk level: low-risk products may use Declaration of Conformity. Products manufactured or sold in Belarus must meet the requirements of various technical regulations. : Conductors cross section is calculated according to various parameters for each circuit. See regulations for details of alternative options using combinations of RCD and MCB. Leave your message in the form below, and we will write back by e-mail!"BELST is the republican authority for technical regulation, standardization, metrology and conformity assessment, energy efficiency, control and supervision in construction, supervision of rational use of fuel, electric and heat energy.
