

Requirements for outdoor distribution boxes at construction sites

Overview

If you're using weatherproof panels or distribution boxes, make sure they are NEMA-rated and appropriate for the worksite. That is why E-abel designs temporary distribution boxes as complete outdoor power systems, not just painted. Whether you need an industrial portable power station, a complete jobsite power station, or help managing temporary wiring and distribution, this will help you stay compliant with all the necessary requirements. Temporary power systems tend to be exposed to harsh environments and frequent use. An outdoor electrical distribution box serves as the critical junction point where incoming power lines are split into multiple branch circuits for outdoor installations, parking lots, building exteriors, and industrial facilities. 5 mm carbon steel and finished with RAL2004 (orange) powder coating for high visibility and corrosion resistance.
