

Restore fiber optic router network to factory settings

Overview

Locate the reset button on the back or bottom of the router. " With the router powered on, insert a paperclip, pen tip, or SIM card tool into the pinhole. Resetting the fiber internet router or modem allows it to refresh and clear any temporary glitches or errors that may be causing connectivity problems. It essentially reboots the device and restarts all its processes, which can often resolve issues like slow internet speed, network connectivity. Follow the instructions in this article to restart or factory reset your GFiber device. Sometimes a Google Fiber device gets into a state that requires you to restart (also known as "Power Cycle") or perform a factory reset. If your internet is acting up, or you've forgotten your password, a reset can be a quick fix.
