

Russian Explosion-proof and Corrosion-resistant Distribution Box

Overview

Explosion-proof terminal boxes KSRV are rectangular enclosures with cover made of modified corrosion-resistant aluminum-silicon alloy, resistant to salt spray and other chemical substances, including hydrogen sulfide and hydrochloric acid vapors. The box consists of a housing and a lid with an explosion-proof thread connection. Inside the housing there's a mounting panel and DIN-rails with terminals, grounding bus and. Pepperl+Fuchs provides a specialized portfolio of Ex d (flameproof) and Ex tb (dust protection by enclosure) certified terminal boxes and junction boxes engineered for reliable use in explosion-hazardous areas. 31 IEC 60079-0 IEC 60079-1 IEC 60079-7 IEC 60079-31 1. There are different temperature classes, dust and gas protection ranges, which vary depending on the material, installed. An explosion-proof distribution box is a rugged enclosure for hazardous areas, safely delivering power while preventing sparks or heat from igniting flammable surroundings.
